

We are a small 'boutique' company, specialising in '1 to 1' personal service.

We can provide:

- \* Strategic Project Management
- \* IT Project Management
- \* Consultancy
- \* Software
- \* Hardware
- \* Customised software solutions
- \* Training

Our philosophy includes thinking "outside the square" and taking a hands-on practical approach - as we have done for the last 4 decades.

We also have some considerable experience working with equipment that is no longer supported, and can provide 'reverse-engineering, repair and re-manufacturing, depending on client requirements.

"BEYOND EXPECTATION"
