

Domain Names run the modern Internet. No longer just a collection of number groups, your unique identifier on the World Wide Web is your Domain Name.

Many businesses owe their success to a cleverly chosen domain that is easy for humans to remember, and provides a clear understanding of who you are and/or what you do.

We provide 2 separate Domain Name Service options:

### **1. MANUAL DOMAIN MANAGEMENT**

We personally manage your domain name/s.

We initially select the best name (or names) for you, and take care of the security, maintenance and renewal functions.

We charge a small additional annual fee for this service.

[click here to Contact Us](#) for more details

### **2. SELF-MANAGED DOMAINS**

DIY - You "Do-It-Yourself" and are entirely responsible for your domain/s.

We do not charge any additional fees, and provide competitive registration fees and a domain maintenance web interface.

(the DIY option is currently under development - will be available shortly)
