

All-inclusive, comprehensive protection: avast! Internet Security 5.0 includes anti-spyware protection, certified by the West Coast Labs Checkmark process, to protect against the latest spyware threats and anti-rootkit detection based on the best-in class GMER technology, built into the scan engine.

Simple to use and fully automated: Automatic incremental updates provide real-time protection of your system, including web surfing. We've made avast! antivirus as simple to use as possible, while allowing full control of your computer's security.

Tried and Trusted: With now over 100 million users of avast!, you can rest assured that you are using one of the most tried and trusted antivirus products in Windows security. avast! supports more MS Windows versions (from Windows 95 to Windows 7) than any other anti-malware product.

Holden Dynamics: Authorised Avast Reseller 

avast! Standard Suite 4.8: for Networks and Servers - offers the most powerful protection to fight virus infections on your server or servers and features a central management console. It works both as primary protection of a file server itself, and, via its optional plug-ins, as protection for various server subsystems, such as electronic mail or firewall/proxy.
